

IGB Technologies is an Electrical Manufacturer's Representative based in Western Canada with offices in Edmonton and Calgary. Incorporated in 2002, our business has expanded to include a balanced line of products by industry-leading electrical equipment manufacturers offering:

Oil filled C88 Transformers	VPI & Cast Resin Dry Type Transformers	DGA & Moisture Monitoring	Cable Bus	Power Analyzers
				
UPSs & Chargers	NGRs & DBRs	LV & MV Cap or Filter Banks	Active Filters	Reactors Filters & SWFs
				

Our well-trained and knowledgeable staff can be relied upon for quality products and support. We are here to support our customers from project conception to completion by providing:

- Product application experience from feasibility studies to detailed engineering
- Budget and firm quotations
- Technical support
- Assistance with project expediting

By carefully screening the manufacturers that we select as partners, we ensure that we will provide you with industry leading engineering support, best in class products along with superior customer service. We look forward to assisting you on your projects:

IGBT Partner Companies:

www.iljinelectric.com

- 3Φ Power Transformers: 25MVA and above, up to 500kV, CSA C88

www.tmctransformers.com

- VPI & Cast Resin, Dry Type Transformers 5 to 52kV class, up to 25MVA

www.vaisala.com

- DGA Monitoring
- SF6 Insulated Breaker Monitor
- Moisture-in-oil measurement
- Humidity & Dewpoint Instruments

www.mphusky.com

- Cable Bus Systems: 600V to 69kV, 800A to 5,000A
- Cable Tray: 3 – 9m spans, CSA Class A to E

www.borripower.com

- 1Φ & 3Φ, PWM UPS Systems
- Monolithic or Modular Designs
- DC Chargers
- Inverters

www.pqcomponents.com

- Reactors
- LV Drive Filters
- Sinewave Filters

www.powerside.com

- LV & MV Fixed or Switched Cap & Filter Banks
- Active Filters
- Power Analyzers

www.powerohm.com

- Neutral Grounding
- Dynamic Braking
- Brake Chopper Modules
- Load Banks
